PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence & Data Science student with hands-on project experience in machine learning, natural language processing, and data-driven applications. Interested in building practical AI solutions and software tools, with a focus on clear implementation, experimentation, and responsible model evaluation.

EDUCATION

B.Tech, Artificial Intelligence & Data Science

Vimal Jyothi Engineering College, Chemperi, Kannur | 2024–2028

CGPA: 8.65

TECHNICAL SKILLS

Programming: Python, SQL **Data & ML:** NumPy, Pandas, Scikit-learn, PySpark, Apache Spark, TF-IDF, Random Forest, SMOTE **Visualization:** Matplotlib, Plotly **Tools:** Git, GitHub, Google Colab, Jupyter

SELECTED PROJECTS

FraudShield AI | Credit Card Fraud Detection

- Built a machine-learning project to classify potentially fraudulent transactions in an imbalanced dataset.
  - Explored SMOTE oversampling, Random Forest classification, model comparison, confusion matrices, ROC-AUC, and feature importance.

Scalable Sentiment Analysis | NLP & Big Data

- Developed a sentiment analysis project using the Sentiment140 dataset of approximately 1.6 million Twitter posts.
  - Used Apache Spark/PySpark for data processing, TF-IDF for text representation, and Random Forest for classification; included single-text sentiment prediction.

DOF Explorer | Robotics Simulation

- Created a Python-based interactive simulator for exploring a 3-degree-of-freedom robotic arm, joint movement, forward kinematics, and end-effector positioning.
  - Used NumPy and Matplotlib for calculations and visualization.
